

Toolbox for Soundtoys Effect Rack

© 2017 Simon Stockhausen

Installation

After unpacking the zip you received you will find a folder *Toolbox* containing a *Readme.pdf* and 5 folders with presets :

- TB Atmosphere
- TB Drum FX
- TB Filter Scapes
- TB Rhythmical
- TB Spaces

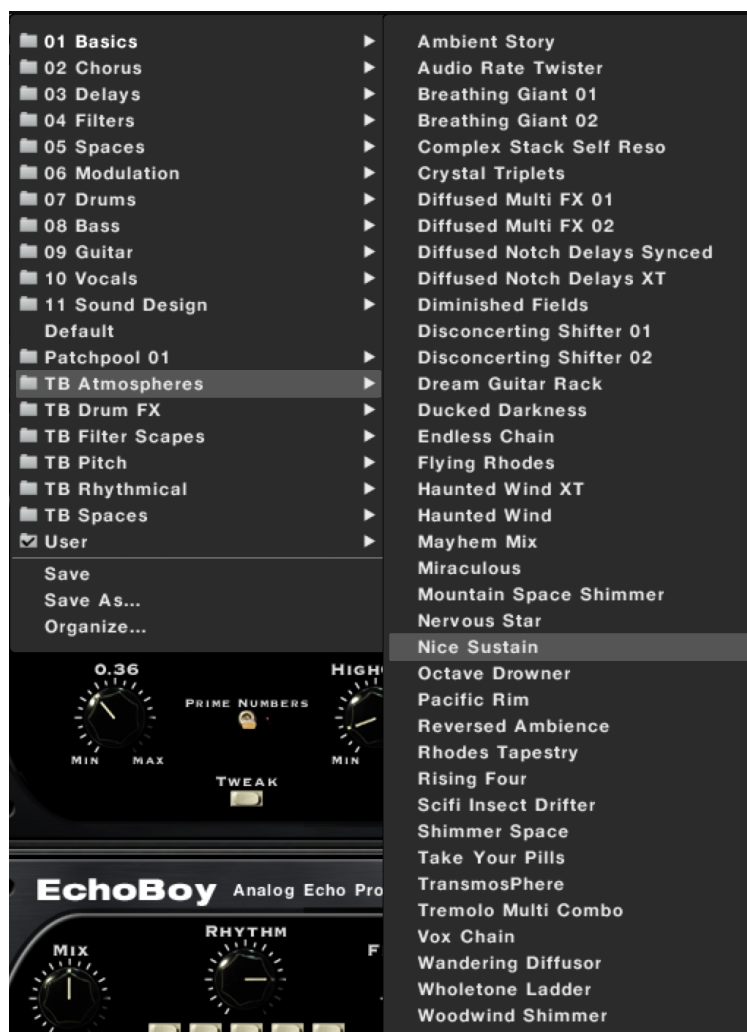

Place these 5 folders here:

Mac: /Users/Shared/Soundtoys/Soundtoys 5/EffectRack/

Windows: C:\Users\Public\Public Documents\Soundtoys\Soundtoys 5\EffectRack\

More info on installation of Soundtoys plug-ins and assets can be found on [this support page](#).

When opening the Effect Rack patch browser it should look something like this:

License agreement and terms of usage

This license agreement is between you (the licensee) and me (Simon Stockhausen).

As these are patches for an FX plug-in and not a sampler or synthesizer, let's keep it rather simple:

1.) The licensee must not distribute the patches from *Toolbox* in any commercial, free or otherwise product. You can use these patches in your music and sound design work and produce audio files with it which you can distribute and sell in any way.

2.) The license to the presets expansion *Toolbox* may not be given away or sold (NFR).

Description

Toolbox for [Soundtoys FX Rack](#) contains a versatile collection of 107 presets (including some variations) for a wide variety of styles. From dreamy ambient spaces to edgy beat processing to intricate delay lines and groovy pad gaters, from endlessly sustained ambiences and creamy filter-scapes to total sonic mayhem, from deep flangers and modulated tapestry to outstanding instrumental spaces, just pick a preset from your toolbox and start making music.

All presets are programmed 100% wet for inserting the effect rack on a bus.

Patch Categories

- TB Atmospheres (39)
- TB Drum FX (13)
- TB Filter Scapes (10)
- TB Rhythmical (30)
- TB Spaces (15)

All audio demos for this set are [here](#).

All video demos for this set and some more experiments with other Soundtoys plug-ins can be found in [this youtube playlist](#).

Technical notes

Leveling

I tried leveling the patches as best as I could, however with some presets it's hard to predict, how much the audio input will resonate with the effect settings. So please start with moderate send levels and take it from there. All presets which use the input audio level as modulation source (e.g. for modulating filter cutoff or tremolo speed) need just the right input level so that a patch sounds as it should. You can also adjust the threshold levels inside the plug-in.

Feedback

Some patches use the RECYCLE-feedback, these patches can build drastically in level depending on the audio input. If you're into experimenting, you can always try, what the internal feedback does to a given patch, the results can be very interesting but please watch your ears and speakers when doing so, inserting a limiter post-effect rack is recommended.

Modifying Presets

Effect Rack does not allow to re-save a patch into it's original folder, so all re-saved patches will have to be stored inside your user folder.
